Headline: ECD case presented at the Winter Skin Seminar

By: Elizabeth S. Anderson, 1/30/17

Picture:

Park City, UT – University of Louisville dermatology resident, Virginia Kartha presented an Erdheim-Chester Disease case study based on the story of an ECD Global Alliance member this past Friday, January 27. The case was included in the *Great Cases from the University of Louisville* talk given at the [2017 Winter Skin Seminar](#) hosted by the University of Louisville. Dr. Kartha wanted to present the case study to demonstrate how long it can take to be diagnosed with ECD and hopes that sharing the case will help raise ECD awareness.

Erdheim-Chester disease (ECD) is a rare blood cancer. The illness is debilitating and can be life-threatening. To learn more or donate visit [www.erdheim-chester.org](http://www.erdheim-chester.org)
